Tree of Life

Dear Ursula K. Le Guin

The Mayan calendar has 20 signs and they follow each other, changing on a daily basis. Your birthday falls on one of the days of the 20-day cycle and this is called the Day Sign. The Day Sign shows your typical attributes. It is also called the Adult Sign. The core of your character begins to shape when you reach puberty around 12-13 years of age, so this sign starts to influence you by this time. Before that, it was mostly your Youth Sign, influencing your life.

When you are 26 years old, until 39 years old, your Day Sign will have the maximum impact on your life. And when you are 52 years old, it is the time of the Mature Sign, to take on the stage.

Your life evolves mostly around what your Day sign offers to you. According to the Mayan Daykeepers, your higher self chooses your Day sign before you are born into this world. You took into consideration your needs for evolving and growing spiritually. Your Day Sign provides you with your life mission, which also brings certain strong and weak aspects of your personality. Naturally, you have no idea about all of these aspects the minute you were born. The purpose of this reading is to hold you a mirror, and remind you about why you came to this life, and why you have chosen this Day Sign, as well as other signs surrounding it. Remember, your Day Sign guides you and reminds you of your spiritual essence and personal mission to help you evolve.

Complementarily, your Galactic Tone and the Trecana Sign also shape how your Day Sign is. There are 13 different combinations of your Day Sign and the Tone you were born tells you, which one you have. Additionally, this Tone determines during which Trecana (Mayan "week" of 13 days) you were born. Your Trecana Sign also has an impact on your Day Sign. It is like the background of your character, influencing about 20-30% of it. Your Day Sign, however, is like the foreground and influencing 70-80% of your character.

Core Sign

Your Day Sign - Night

Akbal (Yucatan) / Aq'ab'al (Kiche)

Personality: Strong, logical, tidy, deep, thoughtful and conservative. Durable, introspective

The Night is the sign of mystery, journey into the unknown and revelation of the true self. Since the expression of the Night naturally reminds us of its opposite, the Day, this sign also is a sign of duality and extremes. Sometimes nothing seems to be happening in your life, and at other times you feel overwhelmed because everything is happening at the same time. You like to live life on the edge.

You get along well with young people and children. It is almost true that you stay young forever. You enjoy following the development of new technologies. Whatever tools, devices, trends are flourishing in the contemporary culture, you would like to follow and use them and stay always updated. You have a flexible and strong mind. You tend to dominate situations. You choose to dress in a way that projects your inner strength. Your energy and physical appearance make you very attractive.

Another name for this sign is the House, which makes you almost obsessed with the feeling of security. In one of the Mayan legends, the Hero Twins go on a journey to search for enlightenment. Just about the time when the night falls, they find an empty house. Since they are on a demanding journey, they decide to sleep in this house. When they wake up in the morning, they feel an expansion of their awareness. Sleeping in this house, gave them a certain awakening and they continue their journey in a more enlightened state. The Night or the House symbolically tells us that the Twins found a sense of security in the unknown that led them to a higher consciousness. Like these twins, you are bound to lead an extraordinary sign due to your nature of searching for the unknown, diving into mysticism. It is totally a right feeling for you to feel at home, feel secure. Sometimes this can show up in your attitude to decorate your house in the most beautiful way possible. Life at home and family is very important for you.

However, on the negative side, you might tend to be stuck with the feeling of security too much in a material way. Or getting stuck with the comfort zones and do not dare to take the risks. Actually, this is the biggest pitfall for a Night sign person. To look for security in the materialistic plane, instead of looking for it on the spiritual plane; your true "Home". This might even put you in a state of paranoia where you worry too much about survival and financial security. If you are a Night person and you experience theft or burglary, this might be a clear sign that you were looking for the security in the wrong place. Maybe now it is the time to find your real Home. Your inner voice has always been telling you to go on this journey of a lifetime. Go and explore the darkness, explore the unknown. Allow yourself to go within, into the void in you and never let your curiosity stop for discovering. Remember, the wisdom and power are given to you to accomplish this spiritual journey. Whatever you need is also within you, maybe just waiting to be explored. And in the end, you find the true feeling of security, which cannot be taken away from you.

Night is also a very romantic sign, as seen by the Mayas. In their social life Night is perceived as being very flirtatious. Love can be the biggest obstacle which you stumble upon. You are a charming and passionate lover and you have a tendency to look for a perfect partner. Your desire to seek the "perfect" partner can become an obsession and this may prevent you from seeing the right soul mate for you. Or, you can easily fall for the wrong person if you don't make a serious effort to find "the" partner to be settled with. As a remedy, you need to keep moving on your spiritual path... When you find confidence in yourself, you will naturally make better choices. This is how you will be able to evaluate the wonderful opportunities knocking on your door and pick the right ones for yourself. Beware of your weaknesses, avoid arrogance and always be honest with yourself to achieve success.

Night is known as having the perfect balance of the wisdom of the "Feminine" (Yin) and "Masculine" (Yang). You are extremely artistic, intuitive and can develop your psychic abilities. You have the potential to be a good Shaman, a holistic healer or a poet. The journey into the dark unknown territories, naturally bring you a lot of inspiration and original ways to express yourself.

You have a benevolent, charming and respected character. You like to start everyday with new hopes. Be aware of innovations and opportunities brought by each new dawn. You are a glimmer of hope for yourself and other people. The Mayans call you the "bringer of dawn" or "a dreamer that brings the new sun by clearing the path of life". Your life purpose is to find the light in the darkness and share it with humanity. You must get rid of all doubt, insecurity and fears that are formed by the darkness or your sub-conscious. Increasing your awareness will help you to release what is false, giving you the opportunity to see through all illusions. During this cleansing and clearing time, it is important to pay attention to the messages and signs. You may receive guidance through your dreams that will bring you peace and happiness.

8

Your Galactic Tone 8

From simplicity to eternity, the 8 energy organizes everything that exists. You have strong organizational skills and you weigh all possibilities with clarity before you reach the balance point. One of your strengths is being aware of basic patterns that emerge in life. You are born with a curiosity to understand patterns and systems that underlie the world around us. This makes you quite an intellectual type. You like going deep and wide in any subject you are studying. Sometimes this will bring about the need to spend a copious amount of time, for learning something that seemed quite simple in the beginning. Or you might find your self-obsessed with detailed information. In other times, you might be too rigid, or way too organized. Tone 8 brings the right amount of stability and balance in your life, nevertheless, sometimes it is good to let go and spice up your evolution with the presence of other tones. The main intention you have is to bring balance and harmony into your life. Understanding the patterns and the systems, you can easily weight where the balance is lost, what needs to be adjusted in order to bring the harmony back.

Your Trecana Sign - Owl

Cib (Yucatan) / Ajmaq (Kiche)

Owl symbolizes wisdom, and especially the wisdom of the old ones. Mayans say that persons born on the day of the Owl are old souls, reincarnated many times to this life. Old spirits carry the wisdom of the ancient times. The energy of the Owl puts you in touch with the other worlds and brings telepathic abilities that keep you connected to the wisdom of sacred places. Naturally so much experience brings about a wisdom, as well as a heavy karmic load, which I will explain in a minute.

As an old soul, you wish the best for yourself and people close to you but you would like to eliminate the people that do not fit your high standards. Because of your teacher like characteristics, you tend to look for position and authority in society. Old souls are usually attributed to the positions of respect, naturally. You know who you are when in the company of other people. You might have well discovered that you have an incredible inner strength that gives you space for quiet, internal observation. This trait brings you wisdom, which is considered much more valuable than any archaeological treasure. Actually, to be able to remember this wisdom, you may take an interest in ancient cultures and their spirituality. You will feel at home, when you are in around an ancient temple, archeological sites or places known to be old centers of energy, of force. Or reading about and practicing ancient esoteric wisdom traditions will empower you in a way, which might even surprise you. In short, you have a fast and easy connection with an ancient spiritual tradition of our planet, whether it is from India, Tibet, Middle East, Mesoamerica or Northern Europe.

These are the resources which will feed you with wisdom and force, however, this sign has drawbacks, as all other signs do. Mayans believe that the Owl people come to this life to purify and burn a lot of karma from past lives. Which makes this lifetime definitely hard to live for them. This is perhaps the utmost important point of awareness for you, about this sign, especially in negative times. Awareness, instead of pessimism, is your way out. I will try to exhibit exactly, what kind of awareness you need. Put simply, when you are in hard times, you are actually burning some karma from your past. So be happy, celebrate that you are cleaning this stuff. And the more aware and centered you are, the more you are surrendered, the more effective (and probably easier) will be this cleaning process.

When you lack balance in your life, you may become numb towards life and be harsh in your relationships. People who love you may be complaining about your rigidity, your hard shell. At such a point, it is important that you forgive yourself. When you are connected to your higher self, the temporary depression that may occur brings valuable lessons. After this experience, you develop a new perspective on life, a more opened spiritual heart and compassion.

You are lazy but wise like the Owl. Even though you may lead an irresponsible life, you sail towards wealth with luck. It is possible that you will live a long and healthy life. Your sharp awareness of difficulties in life and of what works and what does not makes you an excellent guide. The Bee is one of the animals that symbolize this sign. Just like a bee tastes honey, you like to taste the pleasures of life. However, if the Bee gets caught up in pleasuring itself too much, it can fall into the honey and drown. In other words, you need to be aware that you have a tendency for bad habits. When you complete your life lessons and tests, you can become an excellent counselor who helps people to heal from bad habits and addictions.

As I have mentioned before, the Mayans consider the people born on the day of the Owl, to be old souls that have come to this world to clean their karmas. The Owl sign symbolizes a typical karmic cleansing, which means that you are here to cleanse your personal karma and partly the karma of the collective. When you look at your serious and deep outlook at life, you will see how evident it is that you are an old soul as an Owl. You may have had many difficulties, setbacks, and illnesses in your life. In such cases, forgiving and trusting your inner voice will play a critical role in overcoming obstacles. Trusting in yourself, whether you feel very vulnerable, depressive, sad, inadequate or unlucky, will be the key to come out of the dark many times in your life. So trust yourself, no matter what. Listen to that inner voice of wisdom, which speaks to you all the time. And again, be happy that you are able to pay your karmic debts when these problems surface.
